**Box without sleeve**

This is a outer Sleeve

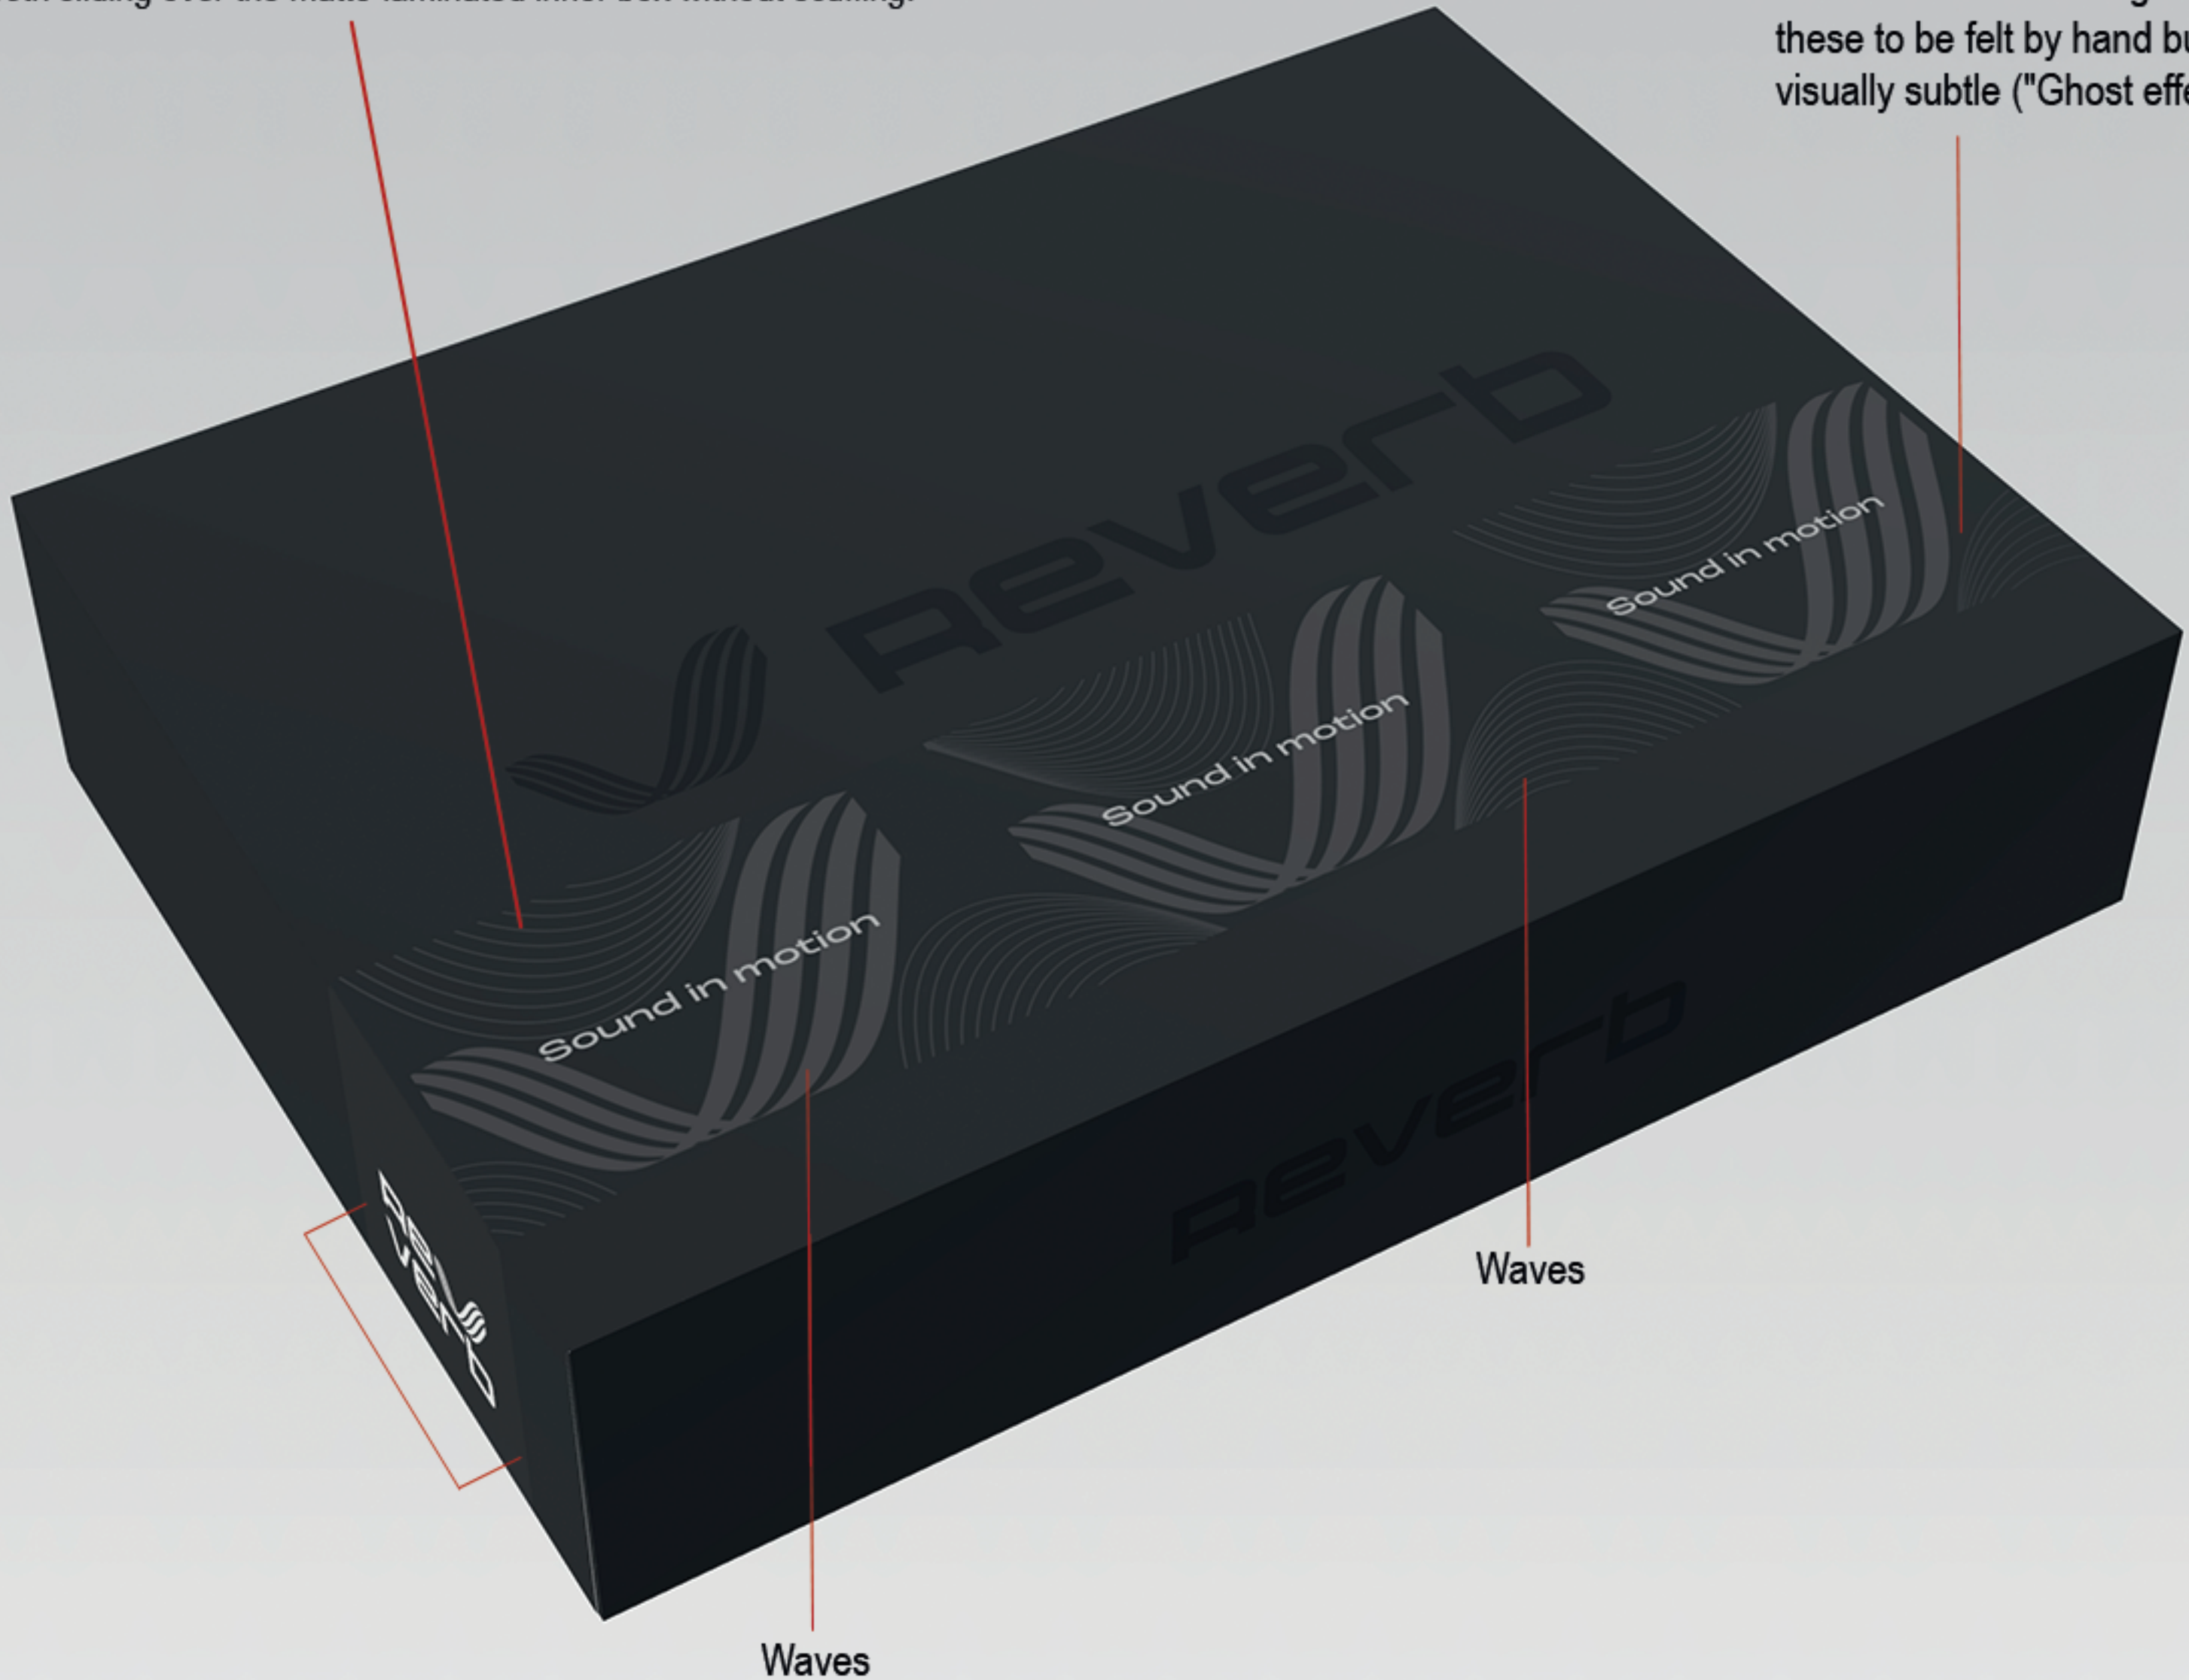

\* Material: 300gsm - 350gsm Coated Art Cardstock.

\* Base Finish: Deep Black Matte Lamination (to match the main box).

Construction: Die-cut, glued, and assembled to fit the inner box.

\* Tolerance: Please ensure a 1.5mm - 2mm clearance to allow for smooth sliding over the matte-laminated inner box without scuffing.

- All the waves on the sleeve not only those that are signposted should be: Matte Spot UV or Raised UV at 30% height. I want these to be felt by hand but to be visually subtle ("Ghost effect").

\* Box with sleeve

Logo (Reverb):  
High-Gloss sectorized UV  
Please ensure perfect  
registration (alignment)

Box without sleeve

For the technical text and legal information on the back, I want High-Density Offset Printing with a Spot Matte Varnish overlay. It should have a subtle tactile feel (raised texture) similar to Apple's retail packaging, ensuring sharp edges for small fonts.

Sharpness: "The text must have zero bleeding. I need high-resolution plates for small typography."

\* Feel : "I am looking for a subtle 'Ink Build-up' effect. It should not be as thick as 3D UV, but noticeably raised when touching the surface

This is the sleeve  
Sizes: 85x6,5 cm

Hot stamping of the logo is required. The perimeter of the print must be completely smooth, without wrinkles or thermal ripples. The stamping must ensure complete adhesion, preventing it from peeling off during handling.

Hot stamping of the logo is required. The perimeter of the print must be completely smooth, without wrinkles or thermal ripples. The stamping must ensure complete adhesion, preventing it from peeling off during handling.

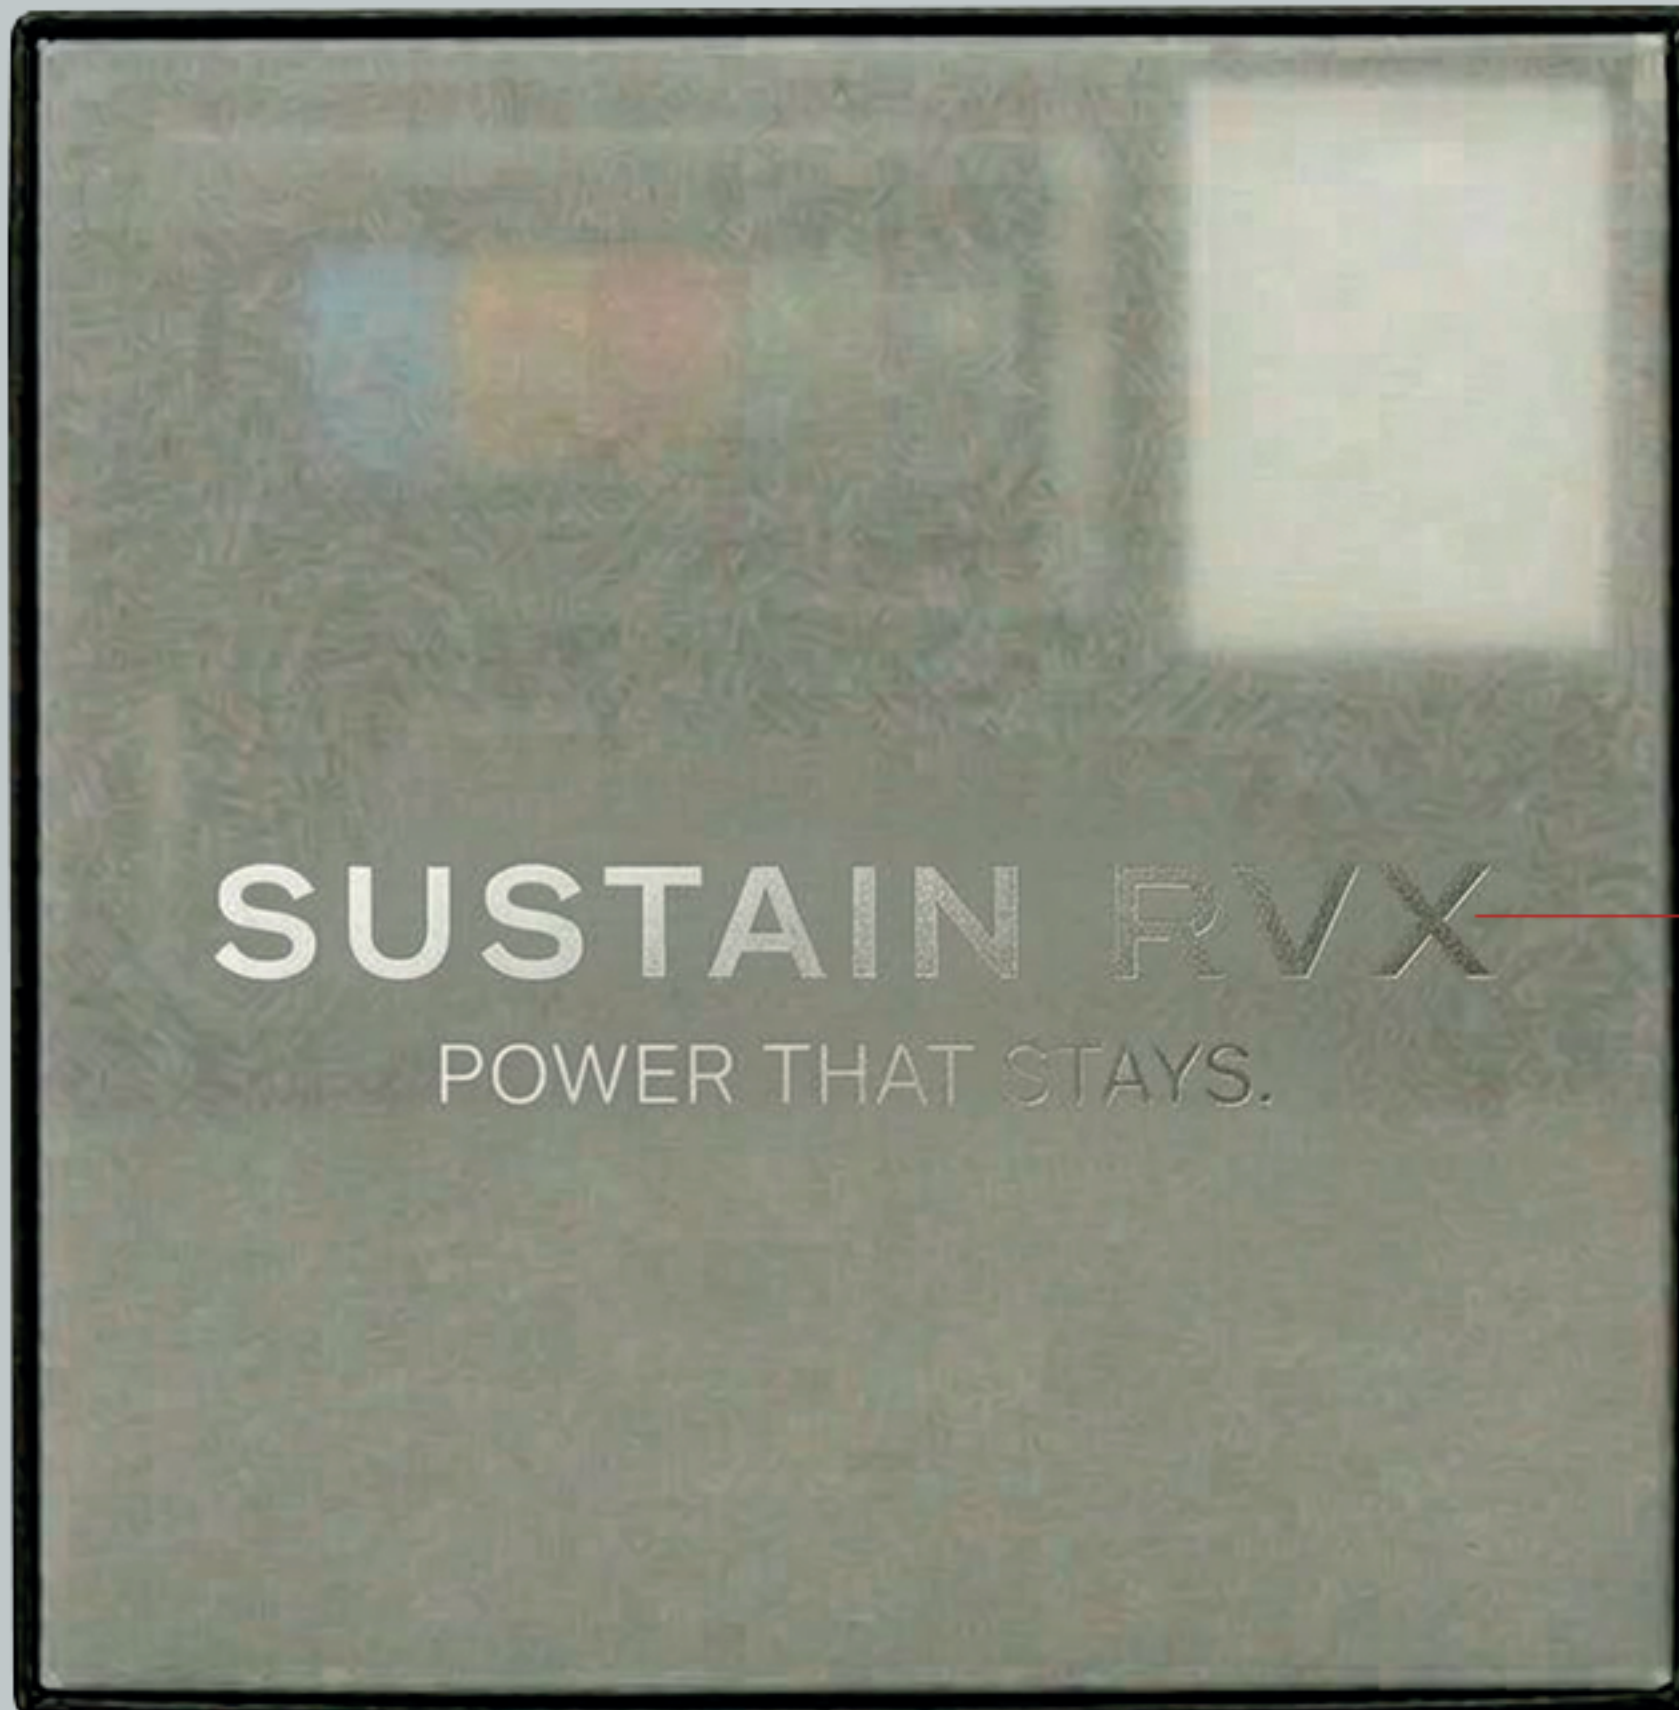

For the top finish, I need a medium-density EVA or EPE foam insert in black.

**Key requirements:**

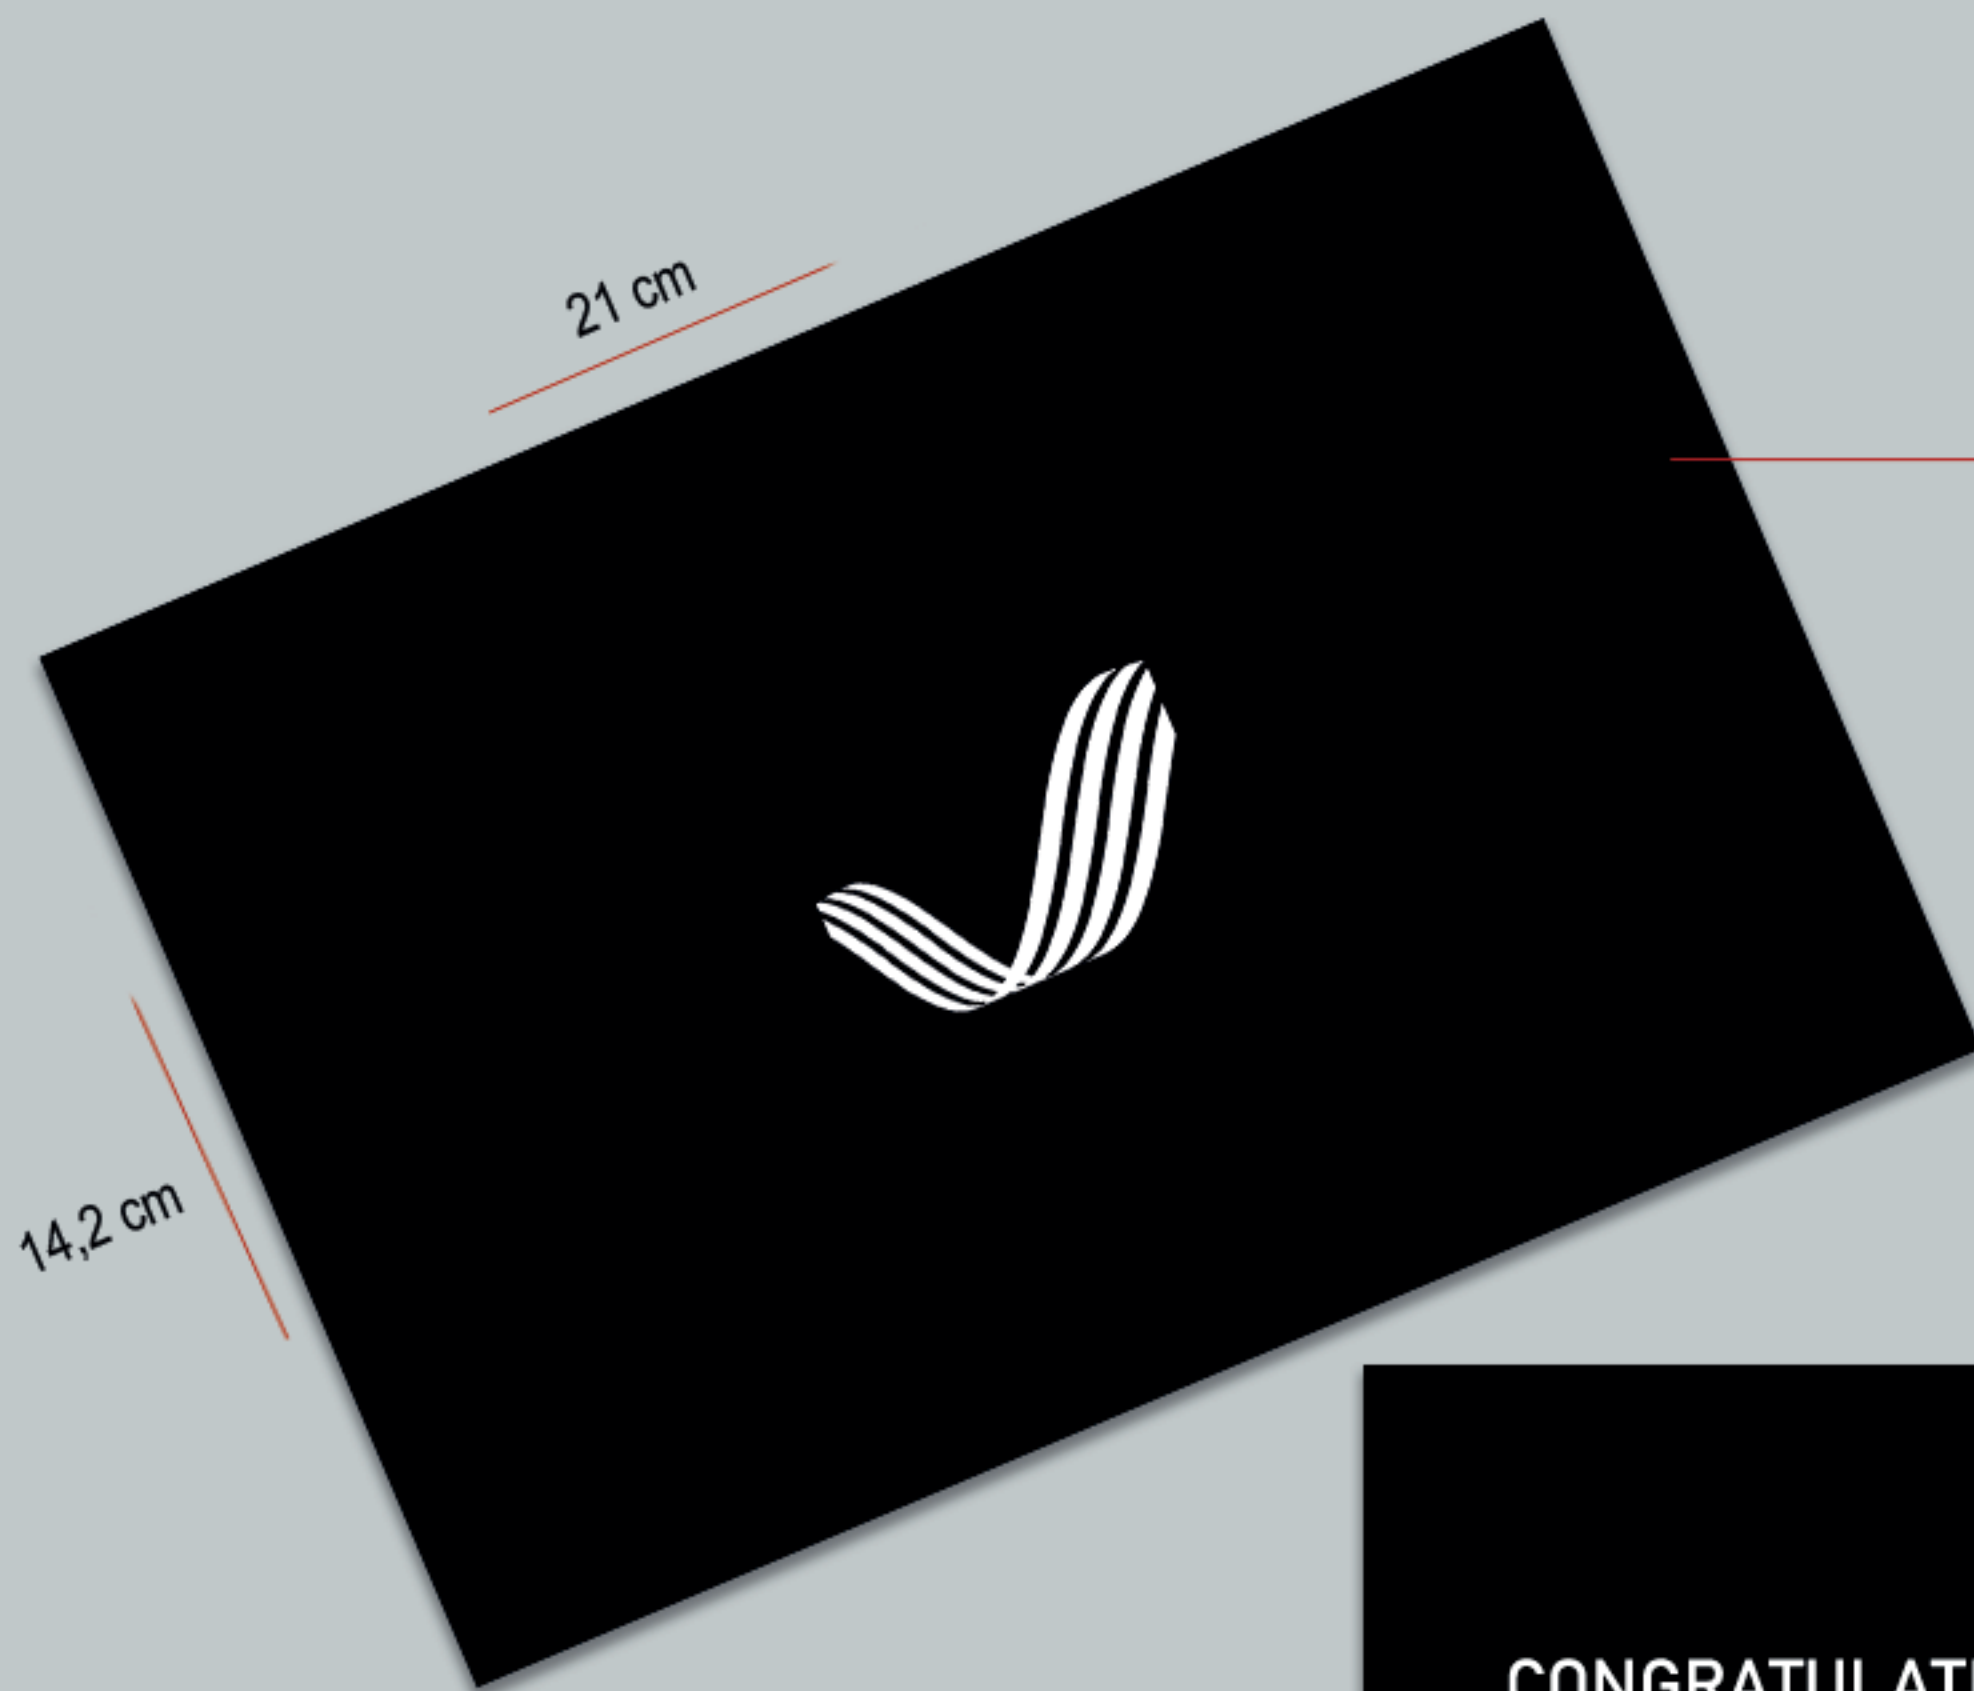

**Finish:** Smooth and uniform (no visible porosity).

**Design:** Must include side handles for easy product removal.

**Cutting:** Precision die-cut to the shape of the piece.

Requires Hot Stamping printing on tracing paper with the product model and the line's slogan perfectly aligned and centered underneath. The perimeter of the print should be completely smooth, without thermal wrinkles or waves. The foil must guarantee complete adhesion, without peeling off or breaking when folding or handling the paper.

It requires hot foil stamping of the logo onto the card. The perimeter of the print must be completely smooth, without wrinkles or thermal ripples. The foil must guarantee full adhesion, without peeling or tearing when the card is bent or handled.

**CONGRATULATIONS, YOU HAVE ACQUIRED  
A PRODUCT WITH **Reverb** QUALITY.**

おめでとうございます、REVERB品質の製品を入手されました。

HERZLICHEN GLÜCKWUNSCH, SIE HABEN EIN PRODUKT  
MIT REVERB-QUALITÄT ERWORBEN

FELICIDADES, USTED HA ADQUIRIDO UN PRODUCTO CON  
LA CALIDAD REVERB.

It requires hot foil stamping of the logo onto the card. The perimeter of the print must be completely smooth, without wrinkles or thermal ripples. The foil must guarantee full adhesion, without peeling or tearing when the card is bent or handled.
